EDUCATION

Gayatri Vidya Parishad College of Engineering *Sept 2023 - Present*
B.Tech in Computer Science and Engineering CGPA: 9.45 (Expected 2027)
Visakhapatnam

Narayana Junior College *2021 - 2023*
Intermediate (MPC) — 97.0%

Sri Krishna Vidyapeet *2020 - 2021*
SSC — 98.3%

CAREER OBJECTIVE

CSE student with experience in Data Analytics and Data Engineering, seeking an internship to work with financial market data, strategy backtesting, and real-time dashboarding. Interested in applying Python, Pandas, SQL, and analytical skills to support data-driven trading workflows, performance metrics (P&L, Sharpe Ratio), and market research.

TECHNICAL STRENGTHS

Languages:	Python, C
Data / ML:	Pandas, NumPy, Machine Learning, NLP, EDA, Time-Series (Financial)
Data Engineering:	SQL, ETL Pipelines, Web Scraping (Selenium, BeautifulSoup)
Visualization:	Power BI, Streamlit (Real-time dashboards), Matplotlib, Seaborn, Plotly
Tools:	Git, GitHub, Jupyter Notebook, Excel
Core CS:	DSA, OS, DBMS
Finance / Trading:	Backtesting (Basic), P&L, Sharpe Ratio, Market Data

PROJECTS

End-to-End Retail Data Analytics Project *Data Analytics*

- Built an end-to-end analytics pipeline to analyze retail customer behavior, sales trends, and product performance.
- Performed data cleaning, feature extraction, and EDA using Python and Pandas; executed business-driven SQL queries.
- Developed Power BI dashboards to visualize KPIs such as revenue, churn, and basket size.
- **Impact:** Enabled data-driven decision-making for marketing and product strategy.

Tech: Python, Pandas, SQL, Power BI, EDA, Data Visualization

Netflix Content Analytics using SQL *Data Analysis*

- Analyzed Netflix catalogs to identify trends across genres, ratings, and geographic distribution.

- Applied aggregations, CTEs, window functions, and filtering for analytical insights.

Note: Demonstrated ability to work with time-series and categorical datasets relevant to market data.

YouTube Channel Web Scraping & ETL (GeeksforGeeks) *Data Engineering*

- Engineered a scraping pipeline to extract video metadata (views, duration, tags, upload date).
- Automated ETL using Selenium & BeautifulSoup; cleaned and structured datasets using Pandas.

Note: Skills transferable to collecting and processing real-time financial market data feeds.

Spam Classifier using Machine Learning *Machine Learning*

- Built a supervised ML pipeline using TF-IDF features for message classification; evaluated using accuracy and F1-score.

Tech: Python, NLP, TF-IDF, Classification

CERTIFICATES

GenAI Powered Data Analytics Job Simulation — Forage (Jan 2026)
Data Visualisation: Empowering Business Insights — Forage (Jan 2026)
Data Analytics Job Simulation — Deloitte via Forage (Jun 2025)
Introduction to Modern AI — Cisco Networking Academy (Dec 2025)
