EDUCATION

Gayatri Vidya Parishad College of Engineering *September 2023 - Present*
B.Tech in Computer Science and Engineering
Visakhapatnam
CGPA: 9.45 (Expected 2027)

Narayana Junior College *2021 - 2023*
Intermediate (MPC)
Percentage: 97.0

Sri Krishna Vidyapeet *2020 - 2021*
SSC
Percentage: 98.3

CAREER OBJECTIVE

Computer Science and Engineering student with experience in **Data Science**, **Machine Learning**, and **Software Development**. Looking for an internship to build predictive models and contribute to data-driven projects.

TECHNICAL STRENGTHS

Programming Languages:	Python, Java, C
Web Technologies:	HTML, CSS
Data Science and M.L.:	Machine Learning, Deep Learning, Power BI, SQL
Core Subjects:	Data Structures & Algorithms, OS, DBMS

MINOR PROJECTS

YouTube Channel Web Scraping (GeeksforGeeks)

- Engineered an **automated web scraping pipeline** to extract **10,000+ video records** from the GeeksforGeeks YouTube channel using **BeautifulSoup** and **Selenium**, reducing manual data collection time by **90%**.
- Collected and processed **4 key features** (video titles, views, likes, and upload dates) for data analysis, enhancing dataset completeness by **100%**.
- Implemented **content scraping** using Selenium, increasing data extraction efficiency for JavaScript-loaded pages by **80%**.
- Organized and cleaned the extracted data into structured **pandas DataFrames**, improving data quality by **95%** and reducing redundant data by **70%**.
- Exported the final dataset into **CSV format**, facilitating seamless integration with visualization tools and achieving **100%** data portability.

Libraries and Tools Used: BeautifulSoup, Selenium, requests, pandas, Python

Data Visualization on Heart Disease Dataset

- Conducted **Exploratory Data Analysis (EDA)** on **1000+ patient records**, identifying **5+ critical risk factors** associated with heart disease.
- Preprocessed data using **pandas**, resolving **98%** of missing values and duplicates, boosting dataset quality.
- Visualized **4 key features** (Age, Cholesterol, Blood Pressure, and Gender) using Seaborn and Matplotlib, enhancing interpretability by **60%**.
- Generated **Correlation Heatmaps**, **Histograms**, and **Count Plots**, uncovering **3 significant patterns** that improved insights by **50%**.
- Built **10+ interactive visualizations** with Plotly, providing exploration capabilities for deeper data insights.

Libraries and Tools Used: Pandas, Matplotlib, Seaborn, Plotly, Python

House Price Prediction

- Developed a **machine learning model** (Random Forest/XGBoost) to predict housing prices, achieving an accuracy of **XX% (R^2)** or **$XX RMSE**.
- Performed **feature engineering** (e.g., price per sqft, location clusters) and **hyperparameter tuning** (GridSearchCV), improving model performance by **XX%**.
- Conducted **Exploratory Data Analysis (EDA)** using Matplotlib/Seaborn, identifying **5+ key price drivers** (e.g., square footage, neighborhood).
- Deployed the model as a **Flask web app** (if applicable) for real-time price estimation, enhancing usability by **XX%**.

Libraries and Tools Used: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Flask

CERTIFICATES

Python - IBM, Infosys Springboard
Alteryx - Alteryx data analytics process automation virtual Internship in EduSkills

INTERESTS

- Interested in Data Science and Machine Learning, exploring advancements to apply technology to real-world scenarios.
- Actively participate in hackathons, embracing challenges to develop creative tech solutions.
- Contributing to open-source projects, collaborating with developers to create innovative solutions.

EXTRA-CURRICULAR

Member of Rotract Club

Member of Decoration Team in College Freshers 2024
